ELSEVIER

Ecological Modelling 93 (1996) 296–297

ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 93

VOL. 93 NOS. 1–3 16 DECEMBER 1996

Editorial v

Editorial: ISEM launches a new era vii

A model 2DLEAF of leaf gas exchange: development, validation, and ecological application
L.B. Pachepsky (Durham, NC, Beltsville, MD, USA) and B. Acock (Beltsville, MD, USA) 1

MAGE, a dynamic model of alkaline grassland ecosystems with variable soil characteristics
Q. Gao (Beijing, China), X. Yang (Storrs, CT, USA), R. Yun and C. Li (Changchun, China) 19

The effect of density dependence on community structure
W.K. Dodds and G.M. Henebry (Manhattan, KS, USA) 33

A simulation model of PCB dynamics in the Lake Ontario pelagic food web
L.J. Jackson (Madison, WI, USA) 43

The effect of habitat patch connectivity on samango monkey (*Cercopithecus mitis*) metapopulation persistence
J. Swart and M.J. Lawes (Scottsville, South Africa) 57

Flux-based estimation of parameters in *S*-systems
P.J. Sands (Tasmania, Australia) and E.O. Voit (Charleston, SC, USA) 75

Modelling copper removal in wetland ecosystems
W.-S. Lung (Charlottesville, VA, USA) and R.N. Light (Aberdeen, MD, USA) 89

Adaptive optimization of renewable natural resources: Solution algorithms and a computer program
B.K. Williams (Burlington, VT, USA) 101

Fire simulations in the Everglades Landscape using parallel programming
Y. Wu, F.H. Sklar, K. Gopu and K. Rutchey (West Palm Beach, FL, USA) 113

Translating across scales: Simulating species distributions as the aggregate response of individuals to heterogeneity
K.A. With and T.O. Crist (Fort Collins, CO, USA) 125

An object-oriented simulation framework for individual-based simulations (OSIRIS): *Daphnia* population dynamics as an example
W.M. Mooij and M. Boersma (Nieuwersluis, The Netherlands) 139

Simulation and evaluation with energy systems blocks
H.T. Odum (Gainesville, FL, USA) and N. Peterson (Pullman, WA, USA) 155

Incorporating diurnal light variation and canopy light attenuation into analytical equations for calculating daily gross photosynthesis
D.L. Liu (Bundaberg, Australia) 175

Mathematical problems of biological competition theory in changing environment
V.G. Il'ichev (Rostov-on-Don, Russia) 191

Object-oriented migration modelling for biological impact assessment
K. Downing and M. Reed (Trondheim, Norway) 203

ARCASIM, a model to evaluate augmentation strategies of the parasitoid *Catolaccus grandis* against boll weevil populations
J.A. Morales-Ramos, K.R. Summy and E.G. King (Weslaco, TX, USA) 221

ARCASIM, a model to evaluate augmentation strategies of the parasitoid *Catolaccus grandis* against boll weevil populations
J.A. Morales-Ramos, K.R. Summy and E.G. King (Weslaco, TX, USA) 221

Population-dynamic instability as a cause of patch structure
B.J. Rothschild (North Dartmouth, MA, USA) and J.S. Ault (Miami, FL, USA) 237
A simple model to predict the duration of the mercury problem in Sweden
L. Håkanson (Uppsala, Sweden) 251

Modelling of Geo-Biosphere Processes
A model analysis of the terrestrial vegetation model of IMAGE 2.0 for Costa Rica
A. Veldkamp (Wageningen, Netherlands), G. Zuidema (Bilthoven, Netherlands) and L.O. Fresco (Wageningen, Netherlands) 263
A Schwarz domain decomposition method for solution of transient unsaturated water flow on parallel computers
H. Vereecken, O. Neuendorf, G. Lindenmayr and A. Basermann (Jülich, Germany) 275
